DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 4, 11, 13 and 14 are rejected under 35 U.S.C. 102(b) and (e) as being anticipated by Kim (WO 00/44990 and U.S. Patent 6,637,973, respectively). Kim discloses a system comprising a light reflecting material (Figure 7, for example) installed on a road surface (200) linearly along the centerline (Figure 1, for example). The material (80) is shown to be longer than the length of vehicles. The system operates in the same manner as the present invention; i.e., light is received from a vehicle and transmitted forwardly of the vehicle and reflected towards oncoming vehicles. While the system of Kim is designed for use with headlights (see abstract, for example), the system would inherently operate in the same manner when used with turn signals, since the light would still be received and emitted by the system of Kim.

Regarding claims 13 and 14, no further patentable weight has been given with respect to orientation of the intersection, since placement of Kim along a roadway which intersected another road would naturally result in the same placement as claimed.
